8. REVIEW OF PERFORMANCE

Please refer to Paragraph 9 on the review of the actual results for 3Q 2018 and for the period from Listing Date to 30 September 2018 against the forecast as disclosed in the Prospectus.

9. VARIANCE FROM FORECAST STATEMENT

Actual vs Forecast for the financial period from Listing Date to 30 September 2018

The gross revenue of US\$81.4 million was 0.4% or US\$0.4 million below forecast largely due to lower recoveries income but partially offset by higher rental income. Recoveries income is recognised from charging tenants for reimbursements of certain property expenses. Recoveries income was lower than forecast in line with the lower property expenses for the period.

Property expenses were lower than forecast by 5.0% or US\$1.7 million, arising from lower net property management fees and lower actual property expenses. In addition, year to date IPO Forecast included certain expenses, such as utilities, that are projected to be higher in the fourth quarter of 2018, but was straight-lined for the purpose of presenting IPO forecast comparatives.

Accordingly, net property income of US\$49.7 million was higher than forecast by US\$1.3 million or 2.7%.

During the period from 1 January 2018 to 30 September 2018, derivative gain from mark-to-market of interest rate swaps amounted to US\$6.1 million as interest rates increased during the period. Derivative gain for the period from 9 November 2017 to 31 December 2017 was US\$1.0 million.

Finance expenses of US\$9.1 million were 1.7% lower than forecast as the revolving credit facilities had yet to be drawn down. The remaining other trust expenses were generally in line with forecast.

Consequently, profit before tax of US\$42.0 million was above forecast by 23.0%.

Tax expense of US\$3.2 million, mainly relating to deferred tax expenses, was below forecast as the US corporate tax rate in relation to distribution of capital gains was reduced from 35% to 21%. This was partially offset by higher current tax expense from tax provision for the Barbados entities as a result of the tax restructuring.

Due to the net effects of the above, net income for the period from 9 November 2017 to 30 September 2018 of US\$38.8 million was higher than forecast by 31.0%.

Overall, income available for distribution to Unitholders of US\$33.5 million was higher than forecast by 0.1%.

Actual vs Forecast for 3Q 2018

During the quarter, gross revenue of US\$22.7 million was 2.0% or US\$0.5 million below forecast largely due to lower rental income and recoveries income. The lower rental income was from a drop in rental from a tenant at Westmoor Center which vacated the premises ahead of its lease expiry and paid a compensation fee in 1Q 2018. The compensation income received will be used to offset the drop in rental income and maintain the distribution until the replacement tenant begins contributing cash rental income. Recoveries income is recognised from charging tenants for reimbursements of certain property expenses. Recoveries income was lower than forecast in line with the lower property expenses for the period.

Property expenses were lower than forecast by 4.8% or US\$0.5 million, arising from lower net property management fees of US\$0.3 million, and lower actual property expenses such as property tax and other property expenses. Some expenses such as utilities and other property expenses are projected to increase later in the fourth quarter of the year.

Accordingly, net property income of US\$13.6 million is similar to forecast.

Derivative gain from mark-to-market of interest rate swaps amounted to US\$1.0 million as interest rates increased during the quarter.

Tax expense of US\$0.9 million was below forecast mainly due to lower deferred taxes recognised.

Due to the net effects of the above, net income for the quarter of US\$9.6 million was 20.2% higher than forecast.

Overall, income available for distribution to Unitholders of US\$9.5 million was higher than forecast by 0.2%.

10. PROSPECTS

In the October 2018 World Economic Outlook, the International Monetary Fund (IMF) reported that the momentum in the US economy is expected to remain strong for the rest of 2018 and 2019. The IMF expects growth for 2018 and 2019 at 2.9%, and 2.5% respectively. At the same time, strong domestic demand is projected to push the economy above full employment, as well as raise imports and the current account deficit. Notwithstanding the US economy is above full employment, market expectations of increases in interest rate is less steep than that projected by the Federal Reserve.

On the office market, CoStar, in its October 2018 report, noted that the national vacancy rate remained flat at 10.2%. 12-month¹ net absorption was 56.1 million sf, supported by stronger economic and job market growth that have kept demand for office space robust. Deliveries for the same period was 66.4 million sf and is set to peak in the next two years, with large projects coming onstream mainly from New York and San Francisco. Meanwhile, rents recorded a 1.9% growth over the 12-month period, driven mainly by markets with strong job growth and little development activities, including Sacramento and Orange County.

The REIT, with assets located in key growth markets in the West Coast, Central, and East Coast, is well-placed to benefit from organic growth, largely from improved occupancies and built-in rental escalations in its portfolio. Office demand in these markets is underpinned by strong and defensive sectors such as technology, education and healthcare.

To capture value and further upsides, the Manager is actively pursuing accretive acquisitions in key growth markets where the REIT has a presence in, as well as other US cities with similar growth characteristics. The Manager remains committed to deliver sustainable distributions and strong total returns to Unitholders.

11. RISK FACTORS AND RISK MANAGEMENT

The Manager ascribes importance to risk management and constantly takes initiatives to systematically review the risks it faces and mitigates them. Some of the key risks that the Manager has identified are as follows:

Tax risk

Changes in taxation legislation, administrative guidance or regulations, and/or any disagreement as to the interpretation thereof, may adversely affect Keppel-KBS US REIT and its Subsidiaries.

Any change in the tax status of Keppel-KBS US REIT and/or any of its direct and indirect subsidiaries (the "Group"), or change in taxation legislation, administrative guidance, or regulation (or any disagreement as to the interpretation thereof) that applies to the Group, could adversely affect the distribution paid by the Group.

In addition, any such tax changes could adversely affect the value of the Group's investments, and/or increase the U.S. and non-U.S. tax liabilities of the Group and/or affect the Group's ability to achieve its investment objectives. Such changes could have a significant negative impact on Keppel-KBS US REIT and its unitholders.

¹ Refers to the period from October 2017 to September 2018.

For example, the U.S. tax legislation modifying the IRC enacted in late 2017 (“2017 Tax Legislation”) impacted the deductibility of certain interest expense for taxable years beginning after 31 December 2017. As a result, Keppel-KBS US REIT restructured certain subsidiaries (the “Barbados Restructuring”), which resulted in certain costs being incurred. In this regard, although the Manager believes that the Barbados Restructuring is responsive to the relevant provisions in the 2017 Tax Legislation, the Manager cannot predict whether such restructuring will remain viable in either the near or long term. The IRS has indicated that certain guidance, with respect to the general provisions of the 2017 Tax Legislation and specifically, Sections 267A and 163(j) is imminent. The Manager cannot predict whether any such regulations or administrative guidance will adversely affect the deductibility of interest by Keppel-KBS US REIT’s U.S. subsidiaries, or whether any such regulations or administrative guidance will have retroactive effect, although the IRS has indicated that retroactivity is likely.

If regulations or administrative guidance result in the non-deductibility of any interest payments by Keppel-KBS US REIT’s subsidiaries, the Group may face material U.S. and/or non-U.S. tax payments and other costs, and may be required to engage in further restructuring at significant additional costs (including costs incurred on an on-going basis). Such regulations and/or administrative guidance may also potentially render restructuring to preserve the deductibility of interest payments by Keppel-KBS US REIT’s subsidiaries impossible, resulting in significant economic impairment to the structure. All such additional tax and/or costs would potentially have a material adverse effect on the Group’s financial condition, cash flows and results of operations.

The Manager will continue to monitor future changes and clarifications and will make future announcements, if and when appropriate.

Interest rate risk

The Manager constantly monitors its exposure to changes in interest rates for its interest-bearing financial liabilities. Interest rate risk is managed on an on-going basis with the primary objective of limiting the extent to which net interest expense can be affected by adverse movements in interest rates through financial instruments or other suitable financial products.

Liquidity risk

The Manager monitors and maintains the Group’s cash flow position and working capital to ensure that there are adequate liquid reserves in terms of cash and credit facilities to meet short-term obligations. Steps have been taken to plan for capital and expense requirements so as to manage the cash position at any point of time.

Credit risk

Credit risk assessments of tenants are carried out by way of evaluation of information from corporate searches conducted prior to the signing of lease arrangements. Tenants are generally required to pay a security deposit as a multiple of monthly rents and maintain sufficient deposits in their accounts. In addition, the Manager also monitors the tenant mix.

Currency risk

Currency risk arises from future commercial transactions, recognised assets and liabilities and net investments denominated in foreign currencies. The Group’s business is not exposed to significant currency risk as the portfolio of properties is located in the United States and the cash flows from the operations of the properties are denominated in US\$. The Group also borrows in the same currency as the assets in order to manage the foreign currency risk. Keppel-KBS US REIT will receive US\$ distributions from the investment properties which will be passed to the Unitholders, either in US\$ or converted to SG\$ at the spot foreign exchange rate at the time of distribution. Keppel-KBS US REIT is exposed to fluctuations in the cross currency rates of the US\$ and SG\$ for operating expenses incurred in Singapore, which are not material. If and when appropriate, based on the prevailing market conditions, the Group may adopt suitable hedging strategies to minimise any foreign exchange risk.

Operational risk

Measures have been put in place to manage expenses, actively monitor rental payments from tenants and evaluate the Group’s counter-parties on an ongoing basis. The Manager also performs an annual review of the adequacy and appropriateness of insurance coverage, reviews disaster and pandemic business continuity plans, and updates and modifies regularly.
